

## **Research & Data Analyst**

Location: Irthlingborough, UK

Job Type: Full Time

### **About Interact Analysis**

Interact Analysis is a market intelligence company covering the most exciting technologies of the future, such as drones, autonomous vehicles and robotics. Our clients include the largest global companies through to innovative, leading-edge start-ups. Founded in early 2017, we now have offices across the world, including the US, China and the UK.

We are expanding rapidly with incredible opportunities for growth and career development. Working at Interact Analysis is stimulating, challenging and fun. We promote an environment of continuous learning, career development and personal fulfilment.

Our leadership team comprises some of the most talented and experienced individuals in the market intelligence industry. We are passionate about what we are building and are looking for like-minded people to join us.

### **The Role**

We are looking to appoint a highly motivated and skilled person to join our growing team in the role of Research & Data Analyst.

The successful candidate will be responsible for the production of syndicated research projects that are core to the business, as well as providing data support to our client-facing analysts, helping them to solve complex analytical problems. The role is highly numerical in nature, so an aptitude and interest in data analysis is required as well as a strong mathematical background. Expect to use applications such as Microsoft Excel, Access and PowerBI extensively. Some client engagement will be required, but for the most part the position is internally focused.

In this role you can expect to be working alongside successful and experienced analysts within the technology industry and will receive training and coaching of the highest standard. While the role is entry-level, expect to be challenged from the start. As the role develops, there may also be the possibility to travel globally for on-site client visits and tradeshow.

Learning the skills to successfully execute market intelligence projects is not easy, so this role is not for the faint-hearted. We have a track-record of hiring and training many of the industry's leading technology analysts, and we are confident that you will want to make a long-term career at Interact Analysis.

### **Required Qualifications & Skills**

- An Engineering, Science, Mathematics or Economics-related degree.
- A solid understanding of economics would be beneficial in the role.
- Proficient in Microsoft Office, especially Excel. Knowledge of Macros would also be beneficial.
- Analytical thinker with an ability to distil information quickly.
- Desire and enthusiasm to learn.

- A positive attitude to work; with a willingness to work hard to achieve individual and shared goals.
- An interest in technology.

### **Benefits**

- A starting salary of £22-25k with the opportunity to increase this rapidly.
- A competitive benefits package, including private healthcare, discounted gym membership and other perks.
- A competitive Pension program.
- 25 days paid vacation.
- Employer that respects and promotes work-life balance.
- A friendly, flexible and supportive work environment.
- Opportunity to develop your career at a fast-growing company.
